OPERATING FOCUS

Procurement coordination**Reliable supply execution****Planned logistics and delivery**

The company combines a lean internal team with an external network of manufacturers, suppliers, logistics providers and specialised service partners.

One point of coordination from requirement to delivery

A practical supply partner

MME supports organisations that need products sourced, suppliers coordinated and deliveries managed against defined specifications and timelines.

OUR APPROACH

Understand the requirement, identify suitable sources, coordinate the supply chain and maintain oversight through delivery and close-out.

DIRECT OVERSIGHT

Fast decisions and clear responsibility.

COORDINATED DELIVERY

Supplier, logistics and client requirements aligned.

SCALABLE SUPPORT

Resources matched to each contract.

The result is a flexible operating model suited to routine orders and larger, contract-specific supply requirements.

Clear direction supports consistent execution

VISION

To be a trusted and responsive partner for procurement, supply and delivery solutions.

MISSION

To coordinate reliable sources, appropriate resources and disciplined delivery processes around each client requirement.

Integrity

Act honestly and responsibly.

Reliability

Follow through on commitments.

Responsiveness

Move quickly and communicate clearly.

Accountability

Maintain ownership from start to finish.

Core services connect sourcing with execution

01 Procurement and sourcing

Identifying suitable manufacturers and suppliers in line with client specifications, commercial requirements and delivery timelines.

02 Institutional supply

Coordinating the supply of goods to public and private organisations through contract-focused planning and communication.

03 Logistics and delivery

Planning collection, movement and delivery activities with internal and external logistics resources.

04 Contract coordination

Maintaining oversight across suppliers, specialist partners, documentation and delivery close-out.

Every engagement is scoped around the client's actual requirement.

Supply scope is matched to each specification

Typical supply categories

GENERAL SUPPLIES

Everyday institutional and operational requirements.

OFFICE & ICT

Office equipment, consumables and technology-related items.

INDUSTRIAL & SAFETY

Workplace, protective and industrial-use requirements.

CONSTRUCTION & MAINTENANCE

Materials and items for works and facility upkeep.

SPECIALISED CONTRACT ITEMS

Products sourced against specific tender or client specifications.

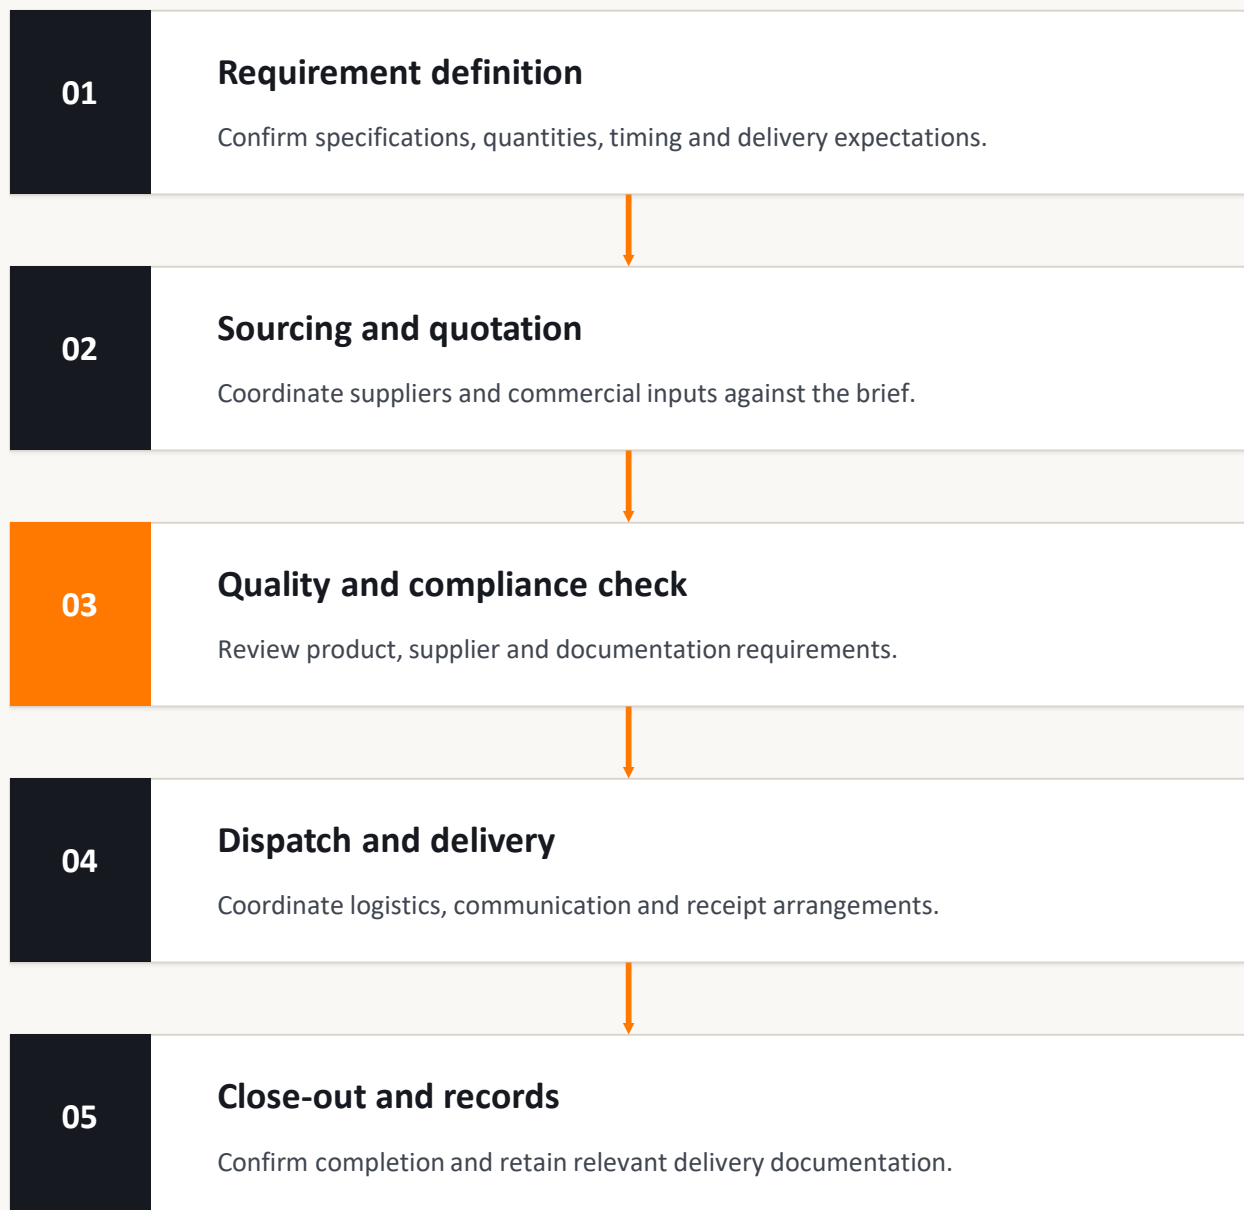

LOGISTICS SUPPORT

Coordinated collection, transport and delivery resources.

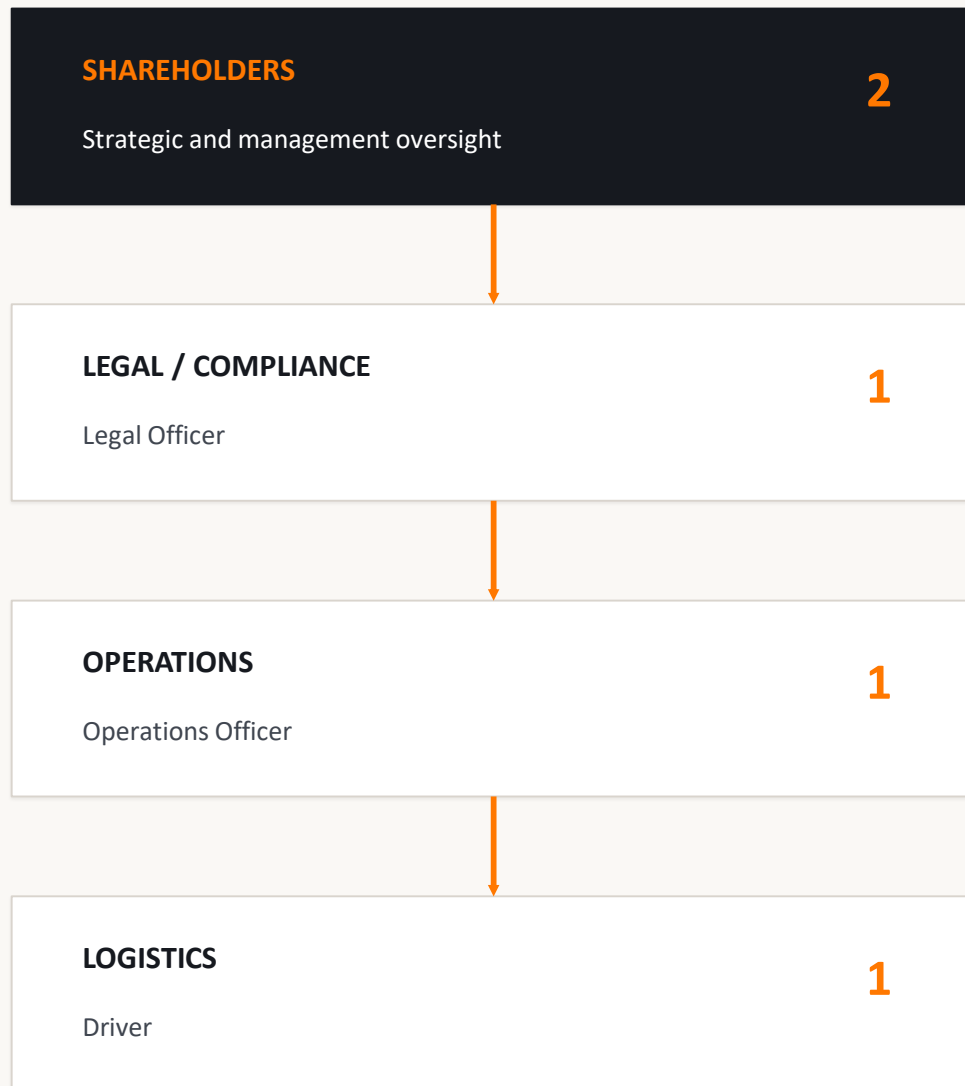

All products and quantities remain subject to the final client specification, availability and contract terms.

A disciplined workflow keeps every requirement visible

From brief to close-out

A lean structure keeps accountability close

The structure is intentionally lean, enabling direct management control, quick decision-making and efficient coordination of procurement, supply and delivery activities.

Lean internally, scalable through coordinated partners

LEAN PERMANENT TEAM.

**SCALABLE DELIVERY
MODEL.**

Although the company maintains a lean permanent workforce, its operational model allows it to undertake larger supply contracts through strategic coordination with manufacturers, suppliers, logistics providers and other specialised service providers.

Manufacturers

Product access and technical sourcing

Suppliers

Commercial coordination and availability

Logistics providers

Collection, movement and delivery

Specialist providers

Contract-specific technical support

This enables MME to scale resources according to the requirements and size of individual contracts while maintaining appropriate management oversight.

Institutional supply requires coordinated execution

SUPPLY EXPERIENCE

Including the Ministry of Defence

The company's experience in supplying institutions, including the Ministry of Defence, demonstrates its ability to coordinate procurement, logistics and delivery requirements.

COORDINATION REQUIREMENTS

Procurement alignment

Logistics planning

Delivery scheduling

Documentation and close-out

The Ministry of Defence's mandate includes safeguarding Zambia's sovereignty and territorial integrity and supporting the Zambia Defence Force.

Reference to institutional experience does not imply endorsement.

Oversight protects quality, compliance and delivery

Management attention is maintained across every stage of the engagement.

01 Legal and compliance oversight

Requirements, documentation and responsibilities are reviewed through the designated legal function.

02 Supplier coordination

Sources are aligned to specifications, timing and availability before delivery commitments are confirmed.

03 Delivery control

Operations and logistics responsibilities remain visible from dispatch through receipt.

04 Communication and records

Stakeholders receive coordinated updates and relevant close-out documentation is retained.

Direct oversight • Clear responsibility • Coordinated execution
